

Athena Info Consulting Private Limited

IT White Spaces Solutions Company

“White Spaces”, in the context of Information Technology, refers to gaps in IT implementation comprising hardware, software and information security. White Spaces can emerge due to evolutions in business, transitions in technology, limitations both in internal technical skills and in existing solutions. And such White Spaces impact business competitiveness in terms of **Customer Reach, Revenue and Returns**.

Athena specializes in providing **Progressively Innovative** solutions to address IT white spaces.

Services offered are:

- IT infrastructure consultancy
 - Design and Architecture of Computing, Network and Storage
 - Platform migration
- Proactive Monitoring of IT assets
 - Computing, Network and Storage related availability, Incident and Problem Management
- Information Security Management
 - Vulnerability Assessment, Penetration Testing, Compliance
- IT infrastructure optimization
 - Capacity Planning, Performance Management, Server consolidation, Bandwidth and Storage utilization
- Point business solutions (software on a hosted model)

Athena strongly believes that progressive innovation in IT has always provided businesses with more quantitative and qualitative benefits than drastic re-engineering. Therefore, Athena’s business philosophy evangelizes “IT-as-a-Service” model and adoption of open source software, internet and mobile technologies as a sure shot prescription for enhancing business competitiveness.
